**Public Hearing for  
Tegen variance** D. Wiese reported on the request from Aron and Susan Tegen for a substandard front yard setback for a new home at 2373 Riverview Drive, VH-456-6-2. He explained the proximity of wetlands and the steep topography that limit the buildable area on the property.

The public hearing was opened. Aron and Sue Tegen, 2475 Woodale Ave., were sworn in and were the only two people to testify. They explained their two years of attempts to design a floor plan and layout for a home to fit on the lot and asked for a variance for the front yard setback to fit their new home on the property. They said that due to the wetlands, steep slopes, flood plain, and environmentally sensitive areas on the lot, the home needs to be pushed closer to the road to fit. The public hearing was closed.

The board discussed the findings of fact:

- The village acquired property in the late 90s to widen Riverview Drive. Several homes in the area have been impacted by the widening of the right of way and now have nonconforming setbacks. The property in question has been

impacted because it leaves less buildable area between Duck Creek and Riverview Drive.

- The property in question has steep slopes, wetlands, floodplain, and an environmentally sensitive area that creates a hardship for the property owner.
- The request is not detrimental to the public interest. Several other properties in the area are affected by similar conditions and have similar nonconforming setbacks.
